FOREWORD

In our quest to ensure that Plateau State, reckoned to be Nigeria's Home of Peace and Tourism, a position bestowed on her by nature’s comparative advantage over every other State in the Country in terms of Natural Tourism Endowments, this administration under my leadership is committed to, not only developing these potentials into the Nation's foremost Tourist destination but also the Tourism investor’s most desired investment haven!

Government has taken this resolve in recognition of the industry’s ability not only as a major source of employment or export earnings, but also with the enormous propensity to contribute to the State’s GDP.

To take travel and Tourism to the “Next Level” therefore, it has become incumbent for us to adopt and develop Tourism to become the financing option in rebuilding a strong, sustainable and a balanced economic base for our dear State.

It is in the light of this that I led a high-powered official delegation on a fact finding mission to the World Travel Market, (WTM), London in 2017 to meet with key Stakeholders in the global industry under one roof to enable us adopt a workable strategy for the development of the industry in line with the global best practice.

This was quickly followed in 2018, with an International Tourism Conference under the theme: “UNLOCKING THE VAST POTENTIALS OF TOURISM AS THE FINANCING OPTION FOR SOCIO-ECONOMIC DEVELOPMENT” where a “State of Emergency” was declared on Tourism.

Not long after studying the conclusions drawn from this conference, I directed and approved the constitution of a high-powered Tourism Policy Drafting Committee with members drawn from the relevant MDAs, Professional Tourism Technocrats, (both Local and International), The Private Sector, General Tourism Practitioners, the Academia and other critical Stakeholders in the Tourism value chain among others, under the able leadership of the Commissioner of the Ministry of Tourism, Culture and Hospitality Hon. Tamwakat Weli.

It is therefore my singular honour to present to you the First Tourism Policy for the State which has been vetted and approved by the State’s Executive Council as a panacea towards charting the road-map for the accelerated development of the Tourism industry in Plateau State.

With this, it has now become imperative that we adopt Tourism as the Key Driver of the State's Economy!

Thank you as we look forward to welcoming you to the “Home of Peace and Tourism” either as a tourist or an investor. Whichever is your vocation, I, on behalf of the peace-loving and hospitable people of Plateau State, wish to assure you that you will have a rewarding experience while on the Jos Plateau!

Thank you.

Rt. Hon. Dr. Simon Bako Lalang
Executive Governor Plateau State
I am delighted to present to you the first Plateau State Tourism Policy which was adopted by the State Executive Council on the 20th of May, 2019. The Policy is aimed at creating a roadmap for the orderly development of the Tourism Industry of the State. As noted by the United Nations World Tourism Organization (UNWTO), the business of Tourism surpasses that of oil export, food products or automobiles. Furthermore, Tourism as an Industry is known globally to be the driving force for the Socio-Economic Development of Tourism Countries and States such as Ours (Plateau State); therefore, we must not be left out.

In this light, the Government of Plateau State, under the able Leadership of His Excellency, Rt. Hon. Dr. Simon Bako Lalung, is determined to position Plateau State in its rightful place in accordance with its appellation “Home of Peace and Tourism”. This distinction shared by no other in Nigeria, is derived from the State’s enormous God given inspiring Natural and Man-made Tourism endowments, garnished with cultural uniqueness and beauty.

As demonstrated by this administration through the declaration of a State of Emergency on Tourism, this action is indeed a glaring sign of the Political will and commitment towards developing the Tourism Industry of the State.

I wish to sincerely appreciate and commend the Drafting Committee chaired by, the Permanent Secretary of the Ministry Mrs. Martha Joseph Azi who worked assiduously to ensure that this Policy came to fruition. My appreciation, also extends to all Professional Tourism Technocrats, the Private Sector, the Academia, all critical Stakeholders in the Tourism Value Chain and the entire patriotic Sons and Daughters of Plateau State who contributed in one way or the other to the development of this Policy. Posterity will forever remember you.

The Policy Thrust is to develop a Sustainable Tourism that capitalizes on the State’s areas of comparative advantage namely; pleasant weather, scenic beauty and cultural heritage to promote Domestic and eventually International Tourism. This Policy therefore aims at opening the gateways of the State for both Domestic and International conferences, seminars, conventions and summits etc. These will be promoted in a secured environment to firmly establish Plateau State as the number one Tourism destination in Nigeria.

The objective of this policy is to increase growth in wealth accruing to the State through Tourism. This can be significantly enhanced through a coordinated and strategic approach to the industry’s development between Public and Private Sectors.

- To generate and increase employment in the Tourism sector, enhance income and alleviate poverty.
- To meaningfully and beneficially involve the Rural Communities in the Tourism enterprise. The Communities where Tourist attractions are located are to be integrated in the development
process and value chain.

- To capitalize on the Nigeria’s National Tourism Master Plan which identifies Jos as a Hub for Central Scenic Cluster and also encourage the development of range of hotels and other areas of investments and most importantly upgrading of the Jos Airport to International standard to attract more flights and promote Tourism.
- To encourage sustainable, inclusive and responsible Tourism by empowering women & youths through knowledge-building & skill development.
- To promote Plateau State as the desirable holiday destination. This will also promote geo-political integration amongst citizens and residents alike.
- To promote Public, Private Partnerships (PPP) in Tourism development in the State.
- To ensure environmental sustainability in the development of Tourism resources.
- To establish a robust collaborative partnership with the Peace Building Agency and to promote a stable and peaceful society upon which the Tourism Industry in Plateau State will thrive.
- To advocate and create awareness amongst Stakeholders on the impact of Travel & Tourism on the society.

Tourism can play an important role in the economic, social and political development of Plateau State. These roles will be focused on the objectives and goals set by the State.

- An overview of the Tourism Sector on the Plateau has indicated that the State is rich in Cultural Heritage, with impressive natural resources, attractive scenes, pleasant weather, similar to that of South Africa, Botswana, Swaziland, Kenya, Tanzania and parts of Uganda. Indeed Plateau State is the Europe of West Africa. The montane vegetation of the Jos Plateau, the abundant sunshine, waterfalls, the volcanic/inspiring rock formations, variety of handicrafts, friendly and hospitable People and many others call for an evidence based Policy that will place the State on the global map of Tourism.

**Economic:** Tourism in other places has assumed an enviable position as a component of National economy contributing to Gross Domestic Product (GDP) of Nations. On the Plateau therefore, Tourism will be fully tapped to serve as a major contributor to the State’s economic growth. Tourism will help in the following:

To increase Internally Generated Revenue (IGR) through Tourists Spending, Taxes on Tourism products.
To gain more from explorers or visitors for both Public and Private Sectors through income multiplier effect.
To increase in Job creation capacities of both the Public and Private Sectors engaged in Tourism in the State, through direct and indirect engagements (Hotels, Airlines, Shuttle Buses, Construction Firms, Restaurant Suppliers etc.).

**Social:** Tourism Development contributes immensely to the development of the conscience of the Society as projects should not be left to Government alone. In order to carry the society along, this...
Policy on Tourism Development will bring out the roles of individuals, Corporate Organizations etc; through robust participation, reaping of economic benefits and liberal but effective legal framework. This is to maximize the contributions of Tourism to the Social Development of the State.

**Political:** Tourism has a great potential of promoting the positive image of the State. Tourism will give first hand and credible information about the State. Therefore, a robust Policy on Tourism and diligent implementation of it will attract good reputation/image for the State locally and internationally, thus translating into rapid economic, social and infrastructural growth which Plateau State is in dire need of.

1. BACKGROUND

Plateau State of Nigeria is located in the central region of Nigeria and is made up of 17 (Seventeen) Local Government Areas. Most parts of the State are located on the geographical Jos-Plateau at the average height of 1200metres with the highest peak of 1800metres above sea level with some rocky features and highland vegetation. This height gives it a cooler and more pleasant weather compared with other parts of the Country.

Similarly, the different types of vegetation support a diversity of natural heritage resources of both fauna and flora (including multiple endemic species) justifying the creation of some wildlife conservation areas by Government, namely: Jos Wildlife Park, Pandam Wildlife Park, Wase Wildlife & Game Reserve, and many gazetted Forest Reserves. All these protected areas have their different and individual themes as major Tourist attractions.

Plateau State is home to about 54 (Fifty-four) Indigenous Ethnic Nationalities with a variety of traditions and cultural heritage unique to each locality and tribe. These are easily recognized through their hospitality, languages, cuisines, music and dance, folktales, festivals, arts/crafts, and architecture among others. Most of such traditions have been preserved over time and integrated into contemporary cultural festivals, thereby, making them another variety of Tourist attractions.

Therefore, there is no doubt that the State is blessed with natural, cultural and man-made endowments which are yearning for further packaging or repackaging into significant Tourism products. The Plateau State Government has taken some notable steps to develop some of the attractions and to provide some Tourist facilities and services that when improved upon would consolidate the State as a leading Tourist destination in Nigeria. Similarly the current level of investments of Private Sector developers and suppliers in the Tourism industry is very appreciable even though there is still more to be done to confirm Tourism is a key driver of sustainable development in the State. It is in view of this that Government is partnering with some Private Investors to manage and redevelop some Government owned Tourism assets.

The State is therefore an island of pleasant weather and beauty in the surrounding hot tropical savannah. The Colonial Masters took advantage of this and developed Jos as a holiday town for their Officers serving in other parts of the Country. This led to the establishment of two Catering Rest Houses in the city which later transformed to Hill Station and Plateau Hotels as well as the Jos Museum “the first purpose built” in Nigeria. The discovery and mining of Tin and Columbite during this period gave Plateau a boost as more visitors were attracted to the Region including the Queen of England and her husband the Duke of Edinburgh who visited in 1956.

In addition to being a major source of employment, Tourism contributes trillion of dollars to the GDP of Countries across the globe. It is therefore an opportunity for Plateau State to diversify and control its revenue base to avoid the over dependence on Federal allocations which fluctuates as a result of changes in the global prices of crude oil.

Having reviewed the importance of Tourism to the State and the measures so far taken to
develop the industry, Government finds it very necessary to chart a more purposeful direction in the development of Tourism through a well articulated Tourism Policy. This is consistent with global best practices and particularly in line with The National Policy on Tourism for Nigeria. In putting up the Tourism Policy for Plateau State, we have involved the Private Sector in the process and this relationship will continue strongly in implementing the Policy.

In order to achieve the purpose of this Policy, Government of Plateau State shall prioritize Tourism as a major driver of the economy.
